ABOUT ME

Motivated and innovative full-stack software developer with a strong foundation in Information Communication Technology. Eager to apply technical skills and academic knowledge to real-world projects. Adept at problem-solving, team collaboration, and rapidly adapting to new technologies. Currently gaining hands-on experience through an internship while advancing academic studies.

EDUCATION

2023 - 2025

INFORMATION COMMUNICATION TECHNOLOGY

Sri Lanka – German Training Institute (SLGTI), Kilinochchi
National Diploma (NVQ Level 5) in Information & Communication Technology

2020 - 2023

SPOKEN ENGLISH DIPLOMA

KEGIN ACADEMY IN NEDUNKENY, MULLAITIVU

2020 - 2023

GCE Advanced Level

G.C.E. Advanced Level – Technology Stream (Bio System Technology) – Passed

EXPERIENCE

2025 - 2026

Software Engineer – Intern

Hashnate

Mertics Private Limited.

- Developed and maintained web applications using PHP (CodeIgniter) and FastAPI
- Built and integrated REST APIs for system automation
- Worked with MySQL databases for data storage and reporting
- Improved system performance and fixed production bugs
- Collaborated with developers using GitHub version control

PROJECTS

• PanvelliQ – Data Intelligence & API Platform

- **Technologies:** Python, Pandas, NumPy, FastAPI, REST API, Figma
- Developed a data intelligence system to process and analyze business data
- Used Pandas & NumPy for data cleaning, transformation, and analytics
- Designed UI wireframes and dashboards using Figma
- Implemented structured JSON APIs for secure and fast data access

• LPEC Campus Moodle System

• Technologies: PHP, MySQL, JavaScript

- Developed a learning management system (LMS) for campus use
- Implemented student, lecturer, and admin login modules
- Built course management, assignment upload, and grading features
- Used MySQL for managing users, courses, and academic records
- Created dynamic and interactive UI using JavaScript

TECHNICAL SKILLS

Programming Languages

- PHP, JavaScript, Python, Java
- HTML5, CSS3

Frameworks & Tools

- CodeIgniter, Laravel
- FastAPI (Python)
- Bootstrap, Tailwind CSS

Web Development

- Full-Stack Web Applications
- Dashboard & Report Systems
- Booking & Management Systems
- POS System Development

Database & Backend

- MySQL, PostgreSQL
- RESTful API Development
- Authentication & Security

Version Control & Dev Tools

- Git, GitHub
- Postman, VS Code

SKILLS

- Problem Solving – Ability to analyze bugs and find efficient solutions
- Logical Thinking – Strong understanding of system flows and data handling
- Communication Skills – Able to explain technical ideas clearly to team members and clients
- Teamwork & Collaboration – Works well in development teams using Agile/Scrum
- Time Management – Meets deadlines and handles multiple tasks effectively
- Adaptability – Quickly learns new technologies and frameworks
- Attention to Detail – Writes clean, error-free, optimized code
